

Web & Email Defense

AMS Web Defense (Powered by WebRoot)

Most enterprise virus and malware infections enter your network through Web browsing. With the dexterity, quantity and complexity of these threats now growing faster than ever, real-time dynamic filtering of Web traffic has become critical for businesses of all sizes. Companies can no longer afford dedicated IT resources to deal with the constantly changing web-based spam and malware threats, and no business can afford the wasted staff productivity of unnecessary employee web browsing, or the damage inflicted by malware to your company's Network. AMS Web Defense leverages a dedicated threat prevention team to protect your network and maintain vigilance against rapidly changing web-based threats

- 30% – 40% of Internet use in the workplace is unrelated to business. (IDC, 2007)
- 52% of organizations report misuse of Internet resources, with the two most common being access to inappropriate sites (41%) and excessive Web surfing (36%). (Department of Trade and Industry Information Security Breaches Survey)
- By the end of 2007, 75 percent of enterprises will be infected with undetected, financially motivated, targeted malware that evaded their traditional perimeter and host defenses while antivirus and network scans that continue to show zero infections. (Gartner, 2007).

Web & Email Defense

AMS Email Defense (Powered by WebRoot)

Worldwide business email volume now exceeds 6.6 trillion e-mails annually! With SPAM and Virus email accounting for over 90% of this total (and growing), e-mail delivery systems and IT resources are continually strained to process the volume. As companies attempt to manage this volume, meet data security and compliance standards and mitigate data loss and legal liability, email management and security has become increasingly important to a company's business objectives, and a key component of its overall security strategy. AMS Email Defense protects your network from unwanted email volume and malicious payload, and provides cost effective email continuity to protect your business from local hardware or network failure.

Increased IT Capacity

- Reduces email volume by 90%, leaving malicious email "in the cloud"
- Per-user pricing scales easily to accommodate growth
- Turnkey managed service reduces IT resource demands
- Fast, low-risk service deployment

Increased IT Efficiency

- No local hardware or software to purchase, update or manage
- Web-based administration offers total visibility, control and flexibility
- On-demand customizable reports demonstrate effectiveness and ROI

Increased Data Security and Compliance

- 100% inbound and outbound content scanning
- Pre-defined compliance dictionaries to meet security and compliance concerns

Lower Total Cost of Ownership

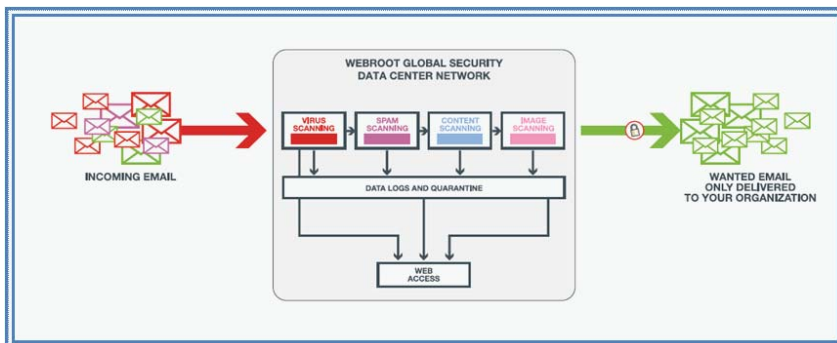

- Predictable per-user operating costs
- Integrated suite of e-mail protection, management and compliance services

Effective and Reliable

- Protects against 98% of spam and 100% of known viruses
- Service desk support available 24x7x365

Business Continuity

- Data spooling for 100% email retention in case of network outage
- Web-based user interface allows read/reply/respond web email access
- Data reconciliation available once normal email operations are restored

Key Features

- Web-based SPAM/Virus protection
- Fast Deployment & Guaranteed Service Availability
- Quarantine notifications for questionable content
- Web-based email user access during local failure
- Email Discovery, Security & Compliance
