

An Alliant Technologies Company

Cabling Your Network's Future

With over a decade of experience, and thousands of cable miles installed, ICS technicians and project managers take pride in designing and installing a robust and stable physical layer for your voice, data, and video networks. ICS has supported customers throughout the US in industries such as pharmaceuticals, manufacturing, education, retail, health care, real estate, and business services.

Layer 1 Engineering Services

- Structured cabling for offices, campuses and data centers
- Wireless LANs
- Security Devices & Camera Systems
