

NetApp Partnership At-A-Glance

Gold Partner

Cost-effective storage solutions from NetApp simplify data management and expand the benefits of virtualized applications. From increased storage utilization and administrator productivity, to the highest application availability with rapid backup and recovery, Alliant Technologies can provide NetApp storage solutions to help customers efficiently expand their data center and disaster recovery capabilities.

NetApp offers flexible disaster recovery solutions that address the various requirements and recovery objectives put forth by organizations. By combining architectural efficiencies with operational simplicity and flexibility, NetApp lowers the cost of disk-based disaster recovery. This allows IT managers to consider extending a disk-based disaster recovery solution to more of their critical applications and data. Cost-reduction efficiencies, simplicity, and flexibility all contribute to making robust disk-based protection more practical for a broader spectrum of your data.

Storage decisions that you make today can mean efficiency gains. NetApp software helps users monitor their storage utilization while also reducing operational expenditures related to troubleshooting, performance analysis, and reporting. Users have realized operational cost savings by implementing these NetApp features and have achieved storage utilization reductions from 10% to 70% while requiring 50% less hardware.

Products & Services

- Storage Analysis & Assessment Tools
- Virtualization Solutions
- Backup and Recovery Solutions
- Storage and Data Management Solutions
- Information Lifecycle Management

Capabilities

- Demo/lab available
- SnapManager for SharePoint, SQL, Exchange, Oracle and VMware

Certifications & Partner Programs

- Gold Partner
- NCIE - NetApp Certified Implementation Engineer
- NCDA - NetApp Certified Data Mgmt Administrator
- NetApp Sales Professional

Resources

- Dedicated Storage Engineers

**Alliant combines deep technical knowledge
with NetApp's industry leading products . . . for IT solutions that work.**
