

VMware Partnership At-A-Glance

Alliant Technologies, a leading IT integrator covering the Northeast US, is an enterprise partner of VMware, the world leader in server virtualization. Alliant engineers have been trained and certified in all aspects of VMware virtualization solutions. Additionally, as a VMware Authorized Consulting (VAC) partner, Alliant has been certified to offer VMware-certified consulting services, such as capacity planning, virtualization assessments and JumpStart programs. Together, VMware and Alliant can support your efforts to improve application availability, increase server efficiency, eliminate planned downtime, and reduce space and power costs at your data centers.

According to Gartner Group, 5% of new servers are installed in virtualized environments today, and they forecast 40% of all servers will be virtualized by 2009. When you are considering consolidation and virtualization technology for your App/Dev, DR, or Production environments, look to Alliant Technologies and VMware for expert advice, implementation, and support.

Products & Services

- Virtualization Assessments
- Server Consolidation
- SAN Integration
- Business Continuity Solutions
- Virtual Desktop Infrastructure
- VMware Lab Manager

Technology Specializations
